

Data Collection and Preprocessing Phase

Date	26 July 2026
Team ID	MIRUTHALA M K
Project Title	Global AI Adoption in Education
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The Global AI Adoption in Education project analyzes the adoption and usage of Artificial Intelligence in the education sector across different countries and regions. The project uses data analytics and Tableau visualizations to study AI usage among students and teachers, adoption trends from 2015 to 2026, rural and urban AI usage, leading AI tools, adoption levels, and regional school AI adoption.
Data Collection Plan	Data related to global AI adoption in education is collected in a structured format containing country, region, year, student AI usage, teacher AI usage, rural AI usage, urban AI usage, AI tool usage, and AI adoption level information. The collected data is organized and prepared for data cleaning, analysis, and visualization using Tableau.

Raw Data Sources Identified	The primary raw data source is the Global AI Adoption in Education dataset used for the Tableau analysis. The dataset contains 1360 AI adoption records covering different countries, regions, years, AI tools, and adoption categories.
